Renewing Himalayan Springs Through The Agency Of Youth & Communities

India Philanthropy Initiative

Himalayan Communities Are Facing A Water Crisis

50% of springs are drying up

70% of springs undrinkable in some regions

Dry land leads to forest fires and impact on livelihoods

Fueled By People, Catalysed by HSS

Creating sustainable water sources by evangelising youth and communities to build ponds, check dams and sand filtration pits

Youth as Change Agents

Active engagement

Proactive inheritance

Communities as custodians

Seeking a solution

Willing to act

Connecting with Youth to affect long-term change

Engaging the curiosity and vitality of young minds, while taking concrete action on the ground

The power of stories

Theatre workshops, songs

Experiential Learning

Site visits, witnessing science-in-action, international student visits

N.

Renewal/Conservation

Check dam creation, afforestation

Transformation

Revisiting springs to ensure they are healthy, Returning to work in their fields

Solving Problems Via Collective Action

Leveraging community resources to increase buy-in and lessen the need for external funding

Community Support

Identification of locations, Granting permission, Powered by Women

Giving in Kind

Voluntary Labour, Donating Material & Tools

Monetary Contributions

Donating funds, Crowdfunding locally

Government advocacy

Mobilising Panchayat funds, Government schemes

In Numbers

Intervention	In Numbers	Cost per intervention
"Chaal" (Percolation pond)	565 (since '07)	6,000
Rain water ferro cement tank	15 (since '17)	40,000

Slow Sand Filter (20-30 families)	25 (since '10)	35,000
-----------------------------------	------------------------	--------

Theater workshop with school children	08 (since '07)	40,000
Broadleaf Saplings	2,80,000 (since '07)	27,500 for 10 Hectares
